Name: David Medina

Academic GPA

Unweighted:

Score in Course Fall & Spring:

Include only if taking tests.

ACT: 27 SAT Reasoning Test: 1840 SAT Subject Tests: will take in the fall

1. Why do you want to attend college? (include your goals, possible major/minor)

I want to attend college so I can major in computer science. I've always had a curiosity about how computers worked, so by studying them I will not only be learning, but also having fun. I plan on working in top-level tech company like Google and Facebook.

2. List five adjectives (or phrases) that describe you and explain each by using a personal anecdote.

- Passionate -> I joined a computer science summer program this summer, which spanned through all weekdays from 9-5pm.
- Curious -> Many of the things that I know about computer science were learned after searching them online.
- Responsive -> I've never missed any homework and have barely missed any days from school.
- Creative -> I've developed a website with the help of two other friends.
- Leaver -> I enjoy learning new things that change my view on the world.

3. Describe and explain your pride in one accomplishment while at Brooklyn Technical High School (it could be a project, a term paper, working diligently to learn a difficult concept, learning how to work cohesively in a collaborative learning situation or ????)

One of the most challenging classes that I have taken in Brooklyn Tech is computer science. Many of the concepts that we learn in the end are the same as what we were extremely challenged with at the beginning.

But I have watched various online lectures from MIT OpenCourseWare that have helped me better understand.
